

Stephany Nusch

Software Engineer · Front-End & Platform Engineering

Vancouver, BC, Canada · stephany7@gmail.com · linkedin.com/in/stephanynusch

SUMMARY

Software Engineer with 9+ years building accessible, high-performance web experiences — including 5 years at Microsoft on the Viva Engage platform, part of Microsoft 365. Specializes in TypeScript and React front-end architecture, design systems, internationalization, and accessibility for products used by millions across Microsoft 365, including Teams, Outlook, and SharePoint. Known for owning complex, cross-team initiatives end-to-end and for using automation and AI to scale engineering impact.

CORE SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Node.js, HTML5, CSS3, Sass

Platforms & Tools: Webpack, Jest, Git, Azure DevOps, CI/CD, Feature Flags & A/B Testing

Focus Areas: Design Systems · Web Accessibility (WCAG 2.1 AA) · Internationalization (i18n) · Performance Optimization · Telemetry & Observability · Developer Tooling

Microsoft 365: Viva Engage, Teams, Outlook & SharePoint integrations

Languages (spoken): Portuguese (native) · English (fluent)

PROFESSIONAL EXPERIENCE

Software Engineer | Microsoft

Jul 2021 – Present

Viva Engage (Microsoft 365) — Vancouver, BC, Canada

- Led internationalization that added support for **11 new languages**, expanding the product's reach to global audiences.
- Shipped user-facing features from design through production rollout — including **personalized content recommendations** and periodic digest summaries — and extracted shared, reusable UI components adopted across multiple product areas.
- Improved product **accessibility to WCAG 2.1 AA**, fixing color-contrast, keyboard-navigation, high-contrast, and 400%-zoom issues across the web app and its Microsoft 365 integrations (Teams, Outlook, SharePoint).
- Built and maintained a reusable **design-system component library** (data-visualization cards, layout grids, and interactive controls) adopted by multiple teams to improve UI consistency and development velocity.
- Re-engineered a **quality-of-service reporting pipeline from Bash to TypeScript** — batching analytics queries and parallelizing independent data sources to significantly cut runtime — with resilient telemetry and automatic fallback.
- Created **developer-experience tooling**: a command-line utility that consolidates engineering tickets and incident data, and a lightweight Node.js dashboard for tracking pull requests and work items.
- Author **technical specifications** and lead cross-team initiatives; partner closely with product managers and designers to deliver intuitive, user-centered experiences across Microsoft 365.

Software Engineer | QuintoAndar

Dec 2019 – Jun 2021

São Paulo, Brazil

- Built React features for internal Operations tooling that streamlined workflows and contributed to higher lead conversion and revenue growth.
- Expanded internal **design-system libraries** and introduced **Jest** testing, strengthening code quality and architectural consistency.
- Championed engineering-guideline improvements and gender-equality initiatives; shared knowledge through regular tech talks.

Full-Stack Developer | PRORADIS

Apr 2019 – Nov 2019

São Paulo, Brazil

- Built cross-platform mobile apps in **Flutter/Dart** for a healthcare platform delivering patient reports and medical imaging online.
- Gained first back-end experience developing services in **C#**.

Web Developer | Vitrio

Aug 2018 – Mar 2019

São Paulo, Brazil

- Developed high-performing storefronts on the **VTEX** e-commerce platform, increasing client sales.
- Used Google Analytics to gather customer insights and personalize the shopping experience.

Web Developer | epico.digital

Sep 2016 – Jul 2018

São Paulo, Brazil

- Delivered client web projects with Bootstrap, Sass, and PHP/Laravel; adopted **Angular** and **Vue.js** as core development tools.

Web Developer | Agência D1UP

Jun 2016 – Sep 2016

São Paulo, Brazil

- Built promotional websites with semantic HTML and modern CSS best practices in a multidisciplinary team.

EDUCATION

B.Tech, Systems Analysis and Development | Fatec Baixada Santista “Rubens Lara”

2013 – 2016
